

Egg Production Systems by **Gilac**

# THE FIRST-CLASS TRAVELLING COMPANY FOR YOUR EGGS !

*Manufacturer of plastic trays, dividers, and pallets since 1999.*

## WHO ARE WE ?

25 years of innovation dedicated to the poultry sector

### 1999 – A benchmark is born

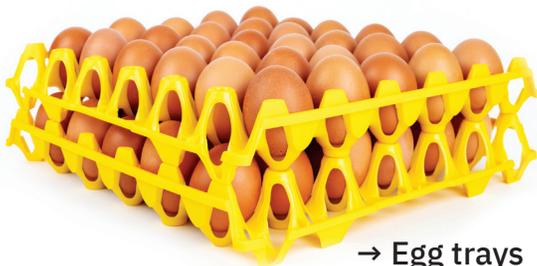

More than 25 years ago, EPS launched the **first rigid plastic egg tray**. Developed in the field in close collaboration with the poultry industry, it quickly replaced the cellulose tray. **Reusable, safer** and more **durable**, it marked a turning point in egg transport. Since then, millions of EPS trays have been used every day around the world, a concrete proof of the **robustness** and **quality** of our products.

### 2010 - A complete system serving professionals

With experience, EPS expanded its range. The **divider** and the **pallet** were added to the offer, creating a **complete and reliable transport system**, designed to meet the needs of poultry industry professionals.

**A SIMPLE AND INGENUOUS SYSTEM,  
MADE UP OF ONLY THREE BUILDING BLOCKS :**

→ Egg trays

→ Dividers

→ Pallet

# WHO ARE WE ?

The union of two French areas of expertise

## 2024 – EPS joins the Gilac Group

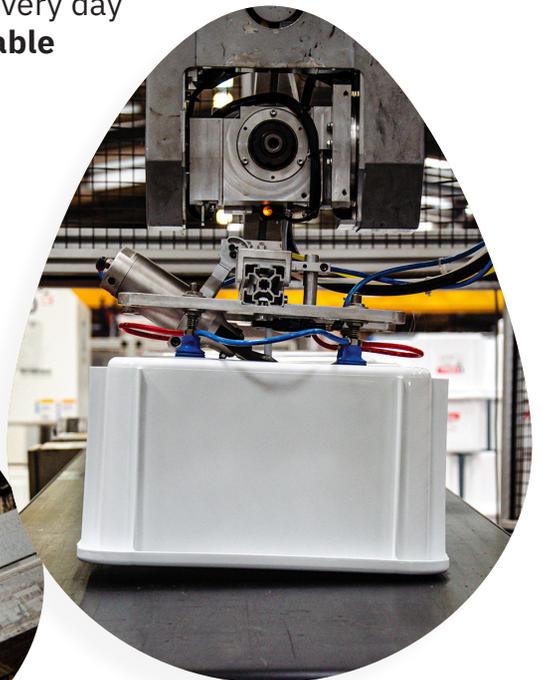

Formerly ‘Eco Plastic System’, EPS becomes ‘Egg Production Systems’, a brand of the **Gilac Group**. A natural alliance with a French player renowned for its expertise in reusable plastics and industrial reliability.

## Gilac, a legacy of excellence

Since 1941, Gilac has been designing and manufacturing **durable plastic food containers in France for professionals**. Rooted in the heart of the Plastic Valley, the company was born in the world of catering, where it quickly became essential, before expanding its expertise to the food industry, agriculture, and today to poultry farming and horticulture.

With more than **900 references available from stock**, Gilac supports thousands of professionals every day by providing **robust, hygienic, and sustainable** solutions.

# WHO ARE WE ?

The union of two French areas of expertise

## A strong and committed family group

By integrating **EPS** and other leading companies in their fields, such as **SPID** (specialized in the design of rigid seed trays for horticulture), Gilac is asserting itself as a strong family group, combining industrial strength with the agility and proximity of an SME.

Our strength lies in:

- **An in-house design office** and modern industrial capacities, allowing us to develop and manufacture our own rigid plastic solutions;
- **A culture of investment**, enabling us to support industries over the long term;
- **A sustainable vision**, focused on reuse and the reduction of single-use packaging.

## Supporting professionals

The Gilac Group’s mission is to **support the agricultural and food industries in their environmental transition**. Whether in catering, poultry farming, or horticulture, we develop products designed to last, created to make professionals’ work easier while reducing environmental impact.

## CSR at the heart of the Gilac Group

The **Gilac Group** places CSR at the heart of its strategy and takes concrete action towards a more responsible industry. **As a key player in reuse**, it drives innovation by integrating recycled materials into its product ranges, developing eco-designed solutions, and supporting its customers in their ecological transition.

These commitments are reflected in tangible achievements: a new eco-friendly headquarters powered by more than 45% photovoltaic energy, the progressive **decarbonation of production machinery**, and a continuous effort to reduce its carbon footprint. Since 2024, the Group has also signed the **Manifesto for a Transforming Industry** alongside the **Lyon Metropolis**, further affirming its role as an engaged player in shaping a **sustainable industrial future**.

Through EPS and its other brands, Gilac reinforces its ambition to be more than a supplier: **a trusted and responsible partner in creating the solutions of tomorrow**.

# PUT ALL YOUR EGGS IN ONE BASKET!

→ Divider  
p.8

→ Pallet  
p.9

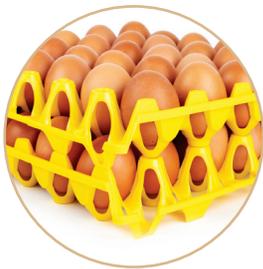

# EGG TRAY

Since the start, one single tray for all egg sizes: our strength lies in simplicity

→ Fits all egg sizes from 40g to 93g

## OUR UNIQUENESS DRIVES OUR SUCCESS!

● **A unique conical system:**

Optimised for manual or mechanical stacking. Prevents contact and impact between eggs.

● **The lightest tray on the market:**

Easy handling and transport.

● **Ultra-resistant cones, designed to last:**

Ensuring reliable stacking and flawless automation over the long term.

**MATERIAL:**  
**VIRGIN PP**  
(FOOD CONTACT)

**SIZE:**  
**30 X 30 cm**  
11.8" x 11.8"

**WEIGHT:**  
**0.126 KG**  
0.278 lbs

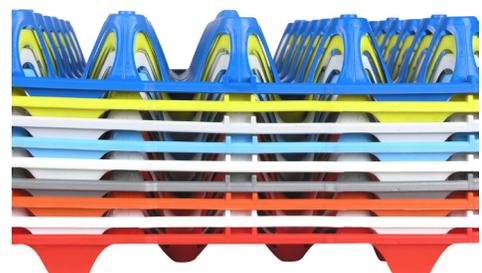

**QUANTITY PER PALLET:**  
**3,000**

## CUSTOMISABLE

Customisable colours, with your **company name** moulded on the side of the tray.

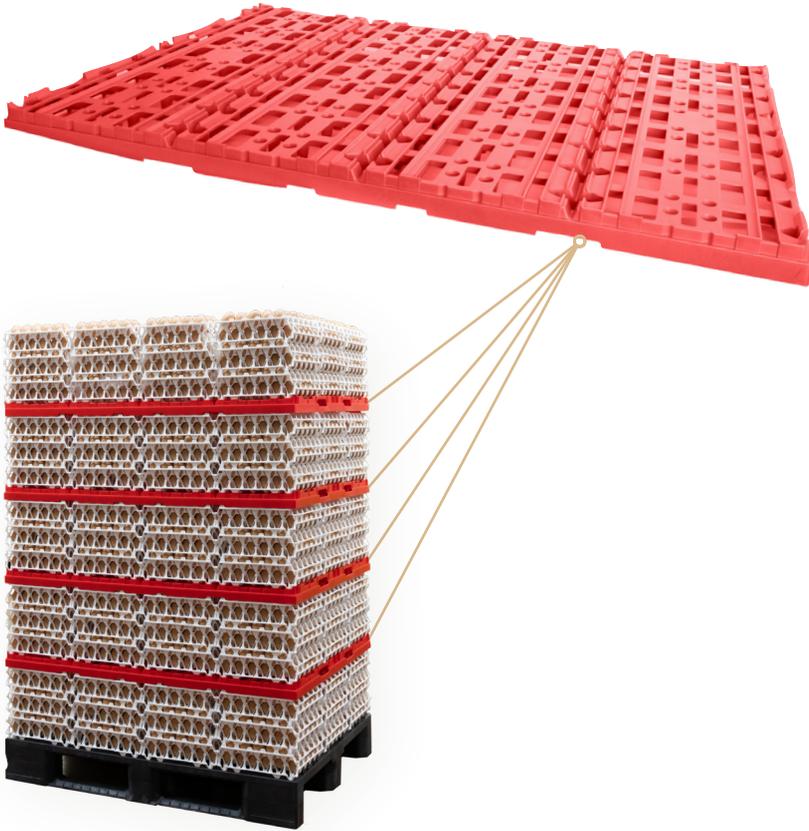

→ Any colour

# DIVIDERS

The divider that keeps your eggs on track!

- Unique divider suitable with all 30 x 30 trays.
- Provides excellent protection for trays during transport, even in the toughest conditions.
- Compatible with all 900 x 1200 mm pallets.

**MATERIAL:**  
**VIRGIN PP**  
 (FOOD CONTACT)

**SIZE:**  
**900 X 1200 cm**  
 35.4" x 47.2"

**WEIGHT:**  
**3.840 KG**  
 8.466 lbs

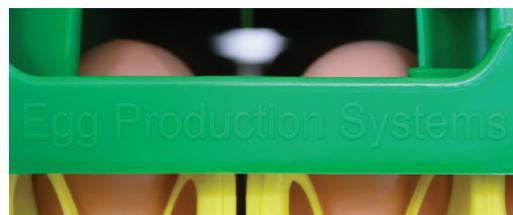

**QUANTITY PER PALLET:**  
**70**

## CUSTOMISABLE

Customisable colours, with your **company name** moulded on the side on the divider.

→ Any colour

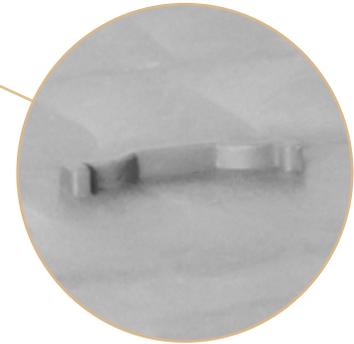

# PALLETS

There is no pallet on the market that offers such high stability during transport!

→ Longitudinal wedges

→ Lateral wedges

- The **blocking systems** on the pallet provide improved stability during transport: the longitudinal and lateral wedges prevent any movement of the trays thanks to their smart positioning.

### MATERIAL:

**VIRGIN PP (FOOD CONTACT)  
OR RECYCLED MATERIAL**

### SIZE:

**900 X 1200 cm**  
35.4" x 47.2"

### WEIGHT:

**17 KG**  
37.48 lbs

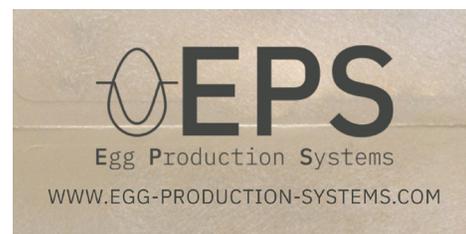

### QUANTITY PER PALLET:

**15**

## CUSTOMISABLE

Our pallets are available in customised colours, with printing to **highlight your brand and facilitate traceability.**

→ Any colour

**OUR MAIN  
EXPERTISE,  
MAKE YOURS  
EASIER**

# TRAYS THAT WON'T CRACK UNDER PRESSURE

EPS trays are made from shape-memory polypropylene, a **durable** and **robust** material that provides **exceptional strength** and **increased longevity**. This innovative design ensures **optimal protection** for your eggs year after year.

### OUR CUSTOMERS SAY IT BEST

“MY TRAYS SAW MY KIDS GROW UP - AND THEY’RE STILL GOING STRONG!”  
ERIC C.

## COMPATIBLE WITH ANY MACHINE ON THE MARKET!

*(Graders/Packers/Washers/...)*

We work in close collaboration with equipment manufacturers to ensure **perfect compatibility**. **The food contact compliance** of our products, certified by official documents, guarantees their conformity with all applicable regulations.

### OUR CUSTOMERS SAY IT BEST

“EPS IS THE BEST MATCH FOR MY MACHINES.”  
BERNARD J.

# SYSTEMS DESIGNED FOR EFFORTLESS AND OPTIMAL WASHING

AT EPS

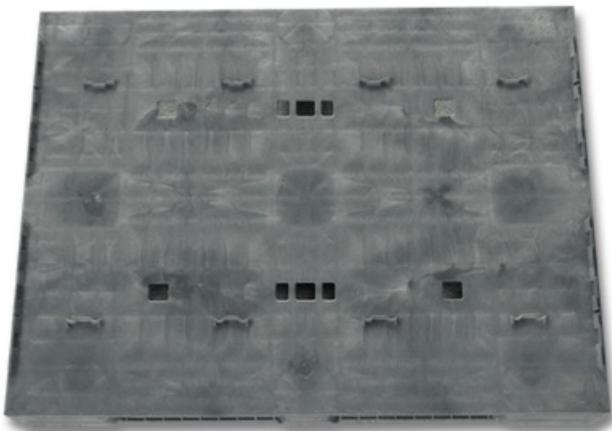

- The intentional 3mm gap between trays when stacked allows for:
  - **Better separation of dirty trays**
  - **Faster and more efficient drying**

STANDARD TRAYS

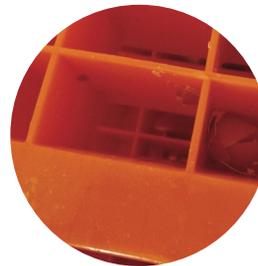

- No spacing, which increases **hygiene risks** and **makes denesting more difficult.**

AT EPS

- The 'solid' deck of the pallets, with no cavities, allows for **better washing.**

STANDARD PALLETS

- Corners and recesses make **cleaning longer** and **less effective.**

## OUR CUSTOMERS SAY IT BEST:

“MY EPS TRAYS NEVER STICK TOGETHER!”  
MEGAN Y.

## UNMATCHED STABILITY: THE KEY TO OUR EGG TRANSPORT SYSTEM

We are fully aware that any occurrence of broken or cracked eggs constitutes an undesirable loss for our clients. That is why **stability** has always been at the heart of our concerns and remains a priority at EPS, exceeding the standards offered by our competitors.

Our egg trays have been meticulously engineered to offer **optimal support, effectively mitigating shocks**. Additionally, all **locking systems** with stop mechanisms on dividers and pallets ensure a high level of structural stability, giving you **peace of mind throughout** transport and handling.

**MAXIMUM EGG PROTECTION → FEWER CRACKS AND BREAKS  
→ GREATER EFFICIENCY AND PROFITABILITY**

- Our trays are easy to stack thanks to their stabilizing lugs.

- The dividers are equipped with safety wedges to firmly hold the stacks of trays in place and prevent any slipping.

- The pallet wedges provide optimal grip for the trays, preventing any movement during transport.

### OUR CUSTOMERS SAY IT BEST

“OUR TRUCKS CAN HANDLE  
THE BUMPIEST ROADS - OUR EGGS HOLD UP.”  
JOSH A.

# THE FIRST-CLASS TRAVELLING COMPANY FOR YOUR EGGS!

- **ALL YOUR EGGS IN THE SAME TRAY:**

From the very beginning, we chose a **single tray** for **all egg sizes**: simpler, more economical.

- **UNRIVALLED STABILITY:**

Our system **ensures maximum egg safety** during transport, reducing breakage and losses.

- **WASHING MADE SIMPLE AND EFFECTIVE:**

Our products have been specifically designed to **simplify washing and drying**, a step that is often demanding but crucial to **ensuring sanitary safety**.
